

EG12000

Twelve Channel ECG Module

ECG

oem.medlab.eu

- Advanced signal processor technology with digital filtering
- Small size (88 x 53 mm), max. height 12 mm (without respiration option)
- Mechanically compatible with Medlab's three and five lead modules
- Monitors I, II, III, aVR, aVL, aVF, C1 - C6 with ten lead cable
- Monitors I, II, III, aVR, aVL, aVF, C with five lead cable
- Monitors I, II, III, aVR, aVL, aVF with four lead cable
- Monitors I or II or III with three lead cable
- Integrated pacemaker detection and lead-off detection for each electrode
- Measurement of respiration rate over the electrodes (optional)
- Single power supply (5 V DC), 250 mW
- RS232 and TTL level serial asynchronous interface
- Highly accurate isolated ECG trigger output
- Integrated patient isolation according to IEC 60601-1, class CF
- Integrated defibrillation protection for limb leads
- Complies with the newest revision of IEC 60601-2-27
- Transmission of pulse rate, ECG waves and respiration curve
- R-wave detection, measurement of pulse rate (30 - 247 bpm)
- Four amplification stages, four curve transmission speeds
- ECG cables and adapters available

Applications:

High-End 12 channel ECG Monitoring

ECG Triggering for CT scanners, Gamma Cameras aso.
